FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

I'm a student at Northern Arizona University, in flag staff. My major is Electronic Media Management, with a minor in marketing. I plan to graduate in May of 2000, so I know the issues behind the low power fm legislation. I hope that the FCC takes the strong stand for the low power legislation. I hope not to enter the industry of broadcasting, and finding the corporate America ruling the airwaves. I hope myself one day to own and run a station at one point. this would allow me to do that with the adoption of low power FM. If We let the corporate broadcasting make the decision, everyone loses. As I get closer to graduation I am realizing that corporate broadcasting my not be the direction I want to go. Low power FM will break-up the corporate broadcasting, so the little man like me can compete.

Thank You,
Joel Yates
